STG LunchBox Tip: Simplify Prepayments

Creating A Faster Checkout Lane

The food service department's task of assuring fast check out lanes is important to school lunch operations. Slow lanes not only frustrate cashiers but also your customers, the students. One way to increase the speed of the check out lane is to encourage students to prepay.

Depositing money into a student's account allows a faster checkout since the cashier doesn't have to handle any money during subsequent transactions. The student is identified at the point of service, the money on account is debited real time, and all the cashier does is hit the enter key to finalize the sale.

Not only will cashiers and students benefit from pre payment, parents also will.

Parents will not have to provide money daily for their children and money deposited on account assure children are using the funds only for school lunch. Remember prepayment makes everyone's school lunch experience better!
