STG LunchBox Tip: Identifying Students

Cash Register Functionality

There are many different ways to identify students at the cash register. The two most popular methods are student ID cards and / or ID numbers.

Other methods for identification are, name look up and all that is needed is the child's last name, homeroom lookup is very popular for the younger children due to the fact the student picture is utilized and biometrics utilizes the students finger as the identifier.

Whichever method your district utilizes it is always a good policy to have an alternative method to identify participants at the cash register.
